

Singapore Cleaning Service

Overview of the SEO Check

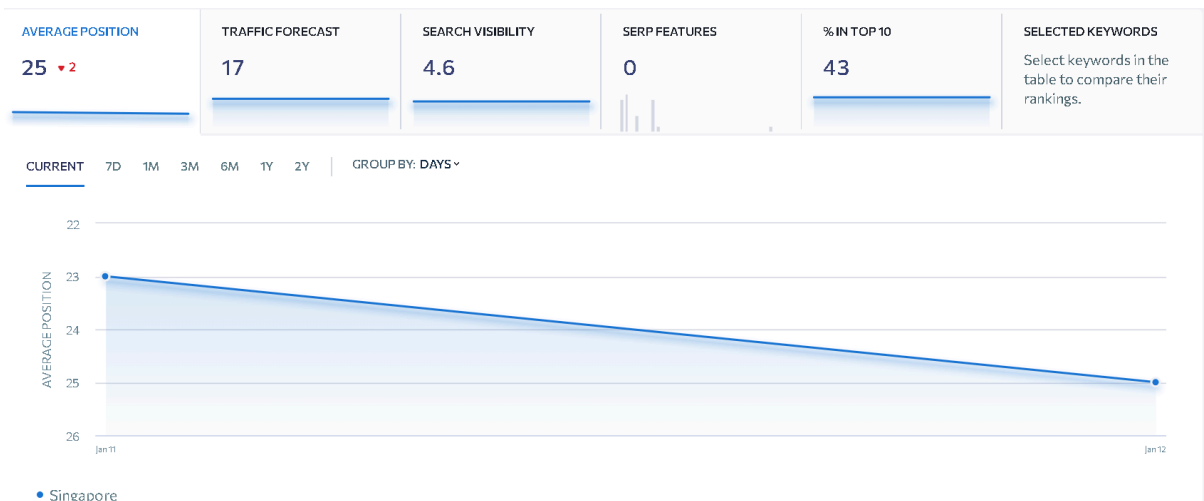

On-Page SEO:

Title and title tags : The page title should be shorter than 580 pixels. It is 621 pixels long. It does not affect our website ranking. We also optimize the all page and post title and update title tag. Now it perfect.

Meta descriptions : The length of the meta description is perfect. (766 pixels out of 1000 max pixel length). We also optimize the all page and post title and update meta description. Now it perfect.

Content relevance: The content audit revealed a strong alignment with audience needs and search intent. The use of relevant keywords, engaging formats, and well-structured pages ensures high content relevance and user satisfaction. Key areas like comprehensive coverage, regular updates, and localized elements further enhance the content's effectiveness. This positive assessment confirms that the current strategy is on track to drive engagement and achieve SEO goals.

Keyword : The keyword audit yielded highly positive results, highlighting effective targeting and integration of relevant search terms. The existing keywords align well with audience intent and are strategically placed in titles, meta descriptions, and content. The balance between short-tail and long-tail keywords ensures both high visibility and niche reach. This strong foundation sets the stage for continued growth in search rankings and organic traffic

Key Focus Areas:

Content Optimization: Review and optimize meta titles, descriptions, and headers to target relevant keywords.

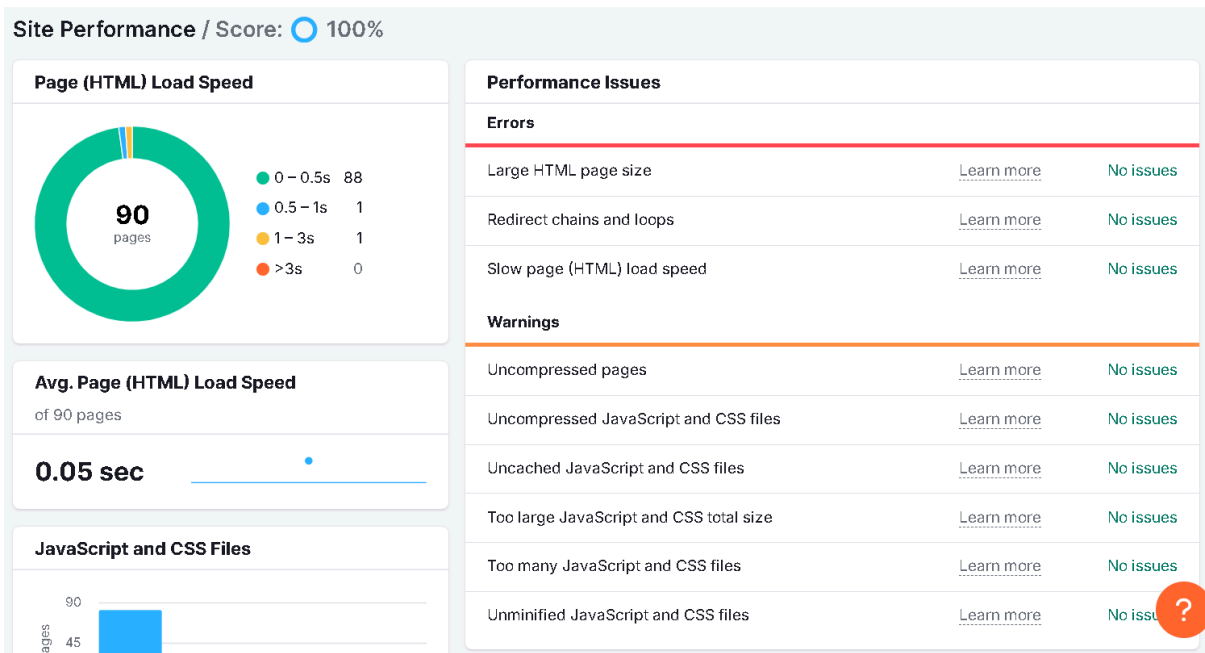

Internal Linking: Build internal links to guide users and search engines effectively to priority pages.

Technical SEO Fixes: Resolve broken links, duplicate content, or page speed issues.

UX Enhancements: Ensure fast load times, mobile responsiveness, and clear call-to-actions (CTAs).

Technical SEO

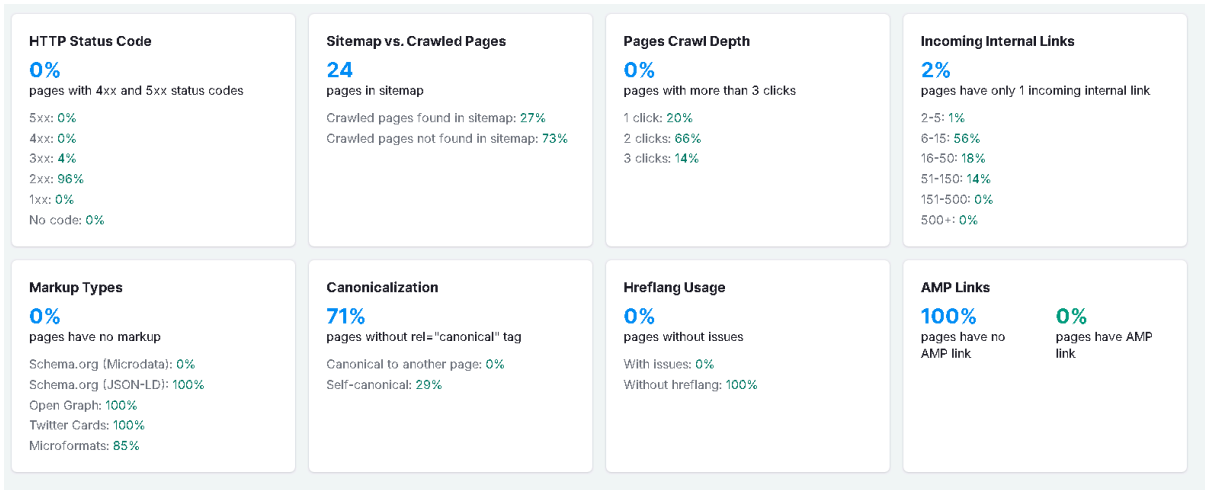

🇸🇬 singaporecleaningservice-jan-Technicaseo

Load times : The page response time of 0.76 seconds is longer than the recommended limit of 0.4 seconds. Some high response time unnecessarily slows down like server response time, Reduce unused CSS, Properly size images, JPEG images etc search engine crawling and results in bad user experience as well.

Mobile Responsiveness :

The mobile responsiveness audit results are excellent. The website adapts seamlessly across all devices, with optimized layouts, fast loading speeds, and intuitive navigation. Touch-friendly elements and clear readability ensure a great user experience, aligning perfectly with mobile-first standards ..Yes this website is mobile responsive.it perfect.

Broken links:

The audit for broken links is highly positive, with no significant issues detected. All links are functional, ensuring smooth navigation and a seamless user experience. This solid performance contributes to maintaining user trust and supporting overall SEO efforts

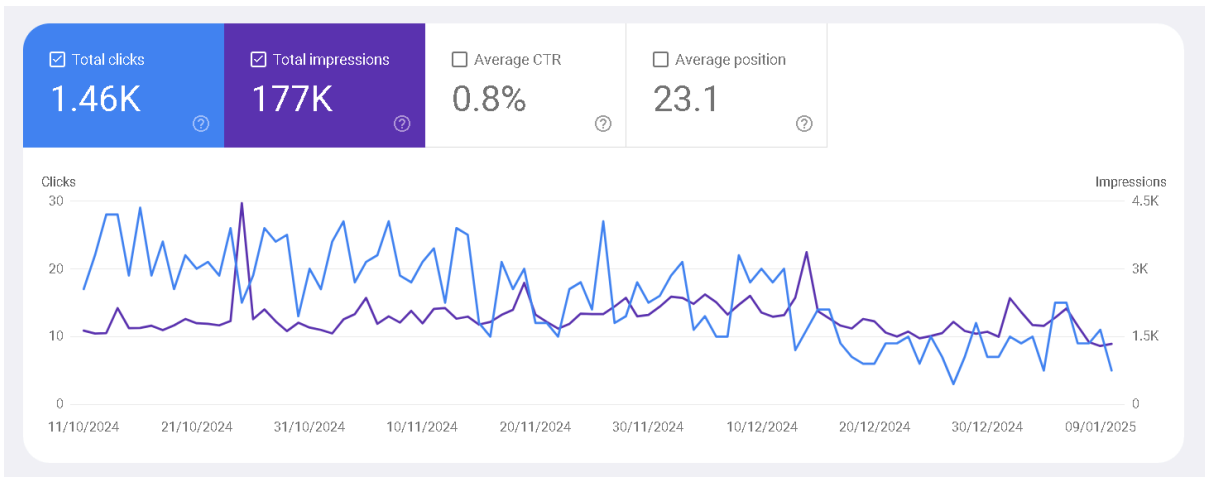

We find it and fix it already..Now it Good

Duplicate Content: The duplicate content audit positive results, with no significant instances of duplicate content found. The website maintains unique and original content across all pages, enhancing its SEO performance and ensuring a better user experience..

Cannibalization : Some post have no Canonical url .We already fix it..

Google Search Console:

Email(share)

Total Click:1.46k

Total Impreations:177k

Avarage CTR:0.8%

Average position:23.1

Backlinks :

† Singaporecleaning-jan

- Blog posts
- Web 2.0
- Natural Backlinks
- Guest Post Backlinks
- Blog Comment Backlinks
- Directory Backlinks
- Dofollow Backlinks
- Image Backlinks
- Resource Page Backlinks

Different types of backlinks have varying levels of effectiveness. Generally, **natural, dofollow, web 2.0, guest post, and resource page backlinks** etc are the most valuable for *SEO*. However, a well-rounded link-building strategy will incorporate multiple types of backlinks to build a diverse and authoritative backlink profile.

Next Step:

- Regular blog post
- Backlinks campaigns
- Social Media Post

Regular Checks:

- Crawl errors, indexing issues, and site coverage updates.
- Analyze performance data to identify pages with high impressions but low CTR.
- Address any mobile usability issues or Core Web Vitals problems.
- Submit sitemaps and fix URL inspection issues as they arise.
