Gannet Nets

It is our goal to improve the fishing industry through thoughtful innovation and data-driven design, creating and delivering superior gear, along with expertise and support for our customers

Services

Consulting, net assembly and design, net diagnostics, and sonar training

SERVICES OFFERED

About

How it all started, the drive behind what we do, the team, and our trusted partners

ABOUT GANNET NETS

Products

Specifics on individually sold net components, electronics, and hardware

PURCHASE PRODUCTS

I think of a successful fishing operation as a good 'fishing system'

The system involves the captain, the crew, the vessel, the electronics, the power (hydraulics), the deck equipment, and the net.

There is no single right way; having been involved with many fishing systems in many different countries, I can see that techniques in one fishery can be applied successfully to others, and some cannot.

General consulting can be everything from helping with the choice of seine, purse-line, purse rings, boom winch, power-block, and wheelhouse electronics, or it can be more involved, like being asked to go on a few day fishing trip to observe an existing fishing system in use, and determine where I think improvements can be made.

Interested in working together? Book a consult.

David is currently working with fishermen in Alaska, West Coast US, East Coast US, Gulf of Mexico, Sea of Cortez, and Cornwall, UK

WITH ACCESS TO PRODUCTS AND MATERIALS FROM MANUFACTURERS ALL OVER THE WORLD, GANNET NETS IS UNIQUELY POSITIONED TO BE ABLE TO OFFER SOME OF THE MOST ADVANCED NET DESIGNS AND PRODUCTS AVAILABLE TODAY
